Simulation Environment

Familiarization Exercises

vii/viii

Base settings, proportional gain is 1, no derivative gain

Figure 1: Proportional gain: 1, Derivative gain = 0

ix

Increase proportional gain to 2

Figure 2: Proportional gain: 2, Derivative gain = 0

x

Increase proportional gain to 4

Figure 3: Proportional gain: 4, Derivative gain = 0

xi

Increased derivative gain to 0.1

Figure 4: Proportional gain: 4, Derivative gain = 0.1

xii

Increase derivative gain to 0.15

(a) Motor Voltage

(b) Servo Angle

Figure 5: Proportional gain: 4, Derivative gain = 0.15
